

Respond to the needs of all pupils in our school, tailoring equipment and the Computing curriculum in line with new trends and developments in modern technology and the new computing curriculum.

Staff training in new technologies and units of work in the new Computing curriculum (programming, coding and algorithms). Focus on the use of Apple technology in the classroom and any other new resources and peripherals.

Use online feedback to develop children's learning through concise marking and provide verbal next steps.

Develop the new school website. Train staff on how to use this effectively and monitor termly updates.

Implement the Corner Stones curriculum and monitor the coverage and teaching of computing

Improve home School link

Hold regular meetings and parent shadowing to involve parents in school life. Also raise the profile and use of Twitter and the school website to communicate with parents and showcase children's work.

Teaching through other areas of the curriculum
Ensure that ICT is being used effectively to develop children's achievement, independence and progress.

To enhance and develop the role of the IT Apprentice.
Focus on the investigation and use of new and emerging technologies with small groups of children, daily troubleshooting and maintenance of the NGFL network. (Through mentoring provided by Telford and Wrekin)
